

# MILOS RTR Truss

The MILOS M1200 RTR Truss boasts a maximum 50m span. For example, on 36m span, it has an incredible UDL of 120 kg/meter with just 278mm deflection. It can therefore withstand even the heaviest loads.

- Truss equipped with wheels for easy manipulation
- Incredible robustness, strength, and reliability
- Suitable if you need a wide-ranging span
- Optimized dimension for transport
- Main chord of 60mm allows the use of CELL 300
- End frames designed of rectangular profiles incl. mounting holes

## **New type of connection designed for RTR truss**

- Diameter 60 mm
- Length 134.5 mm
- Edges rounded with radius
