

New alternatives for screen mounting

The new TV Bracket (TV-BRCKT) from MILOS expands the versatility of your truss structures by allowing you to safely and securely attach LCD and Plasma screens to the main horizontal or vertical tubes of your truss, eliminating the need for two separate brackets. A standard VESA compatible frame and all connection materials are included.

- Designed to hold LCD and Plasma screens
- Attaches to horizontal or vertical truss tubes
- Standard VESA compatible frame
- All connection materials included

New alternatives for screen mounting
